📄 Summary

Senior Software Engineer with experience working with International teams in industries like PC Manufacturing, Hardware, AI/Machine Learning, FinTech, and Healthcare. Focused on Product ownership, Quality and strong communication.

🧠 Skills

Programming Languages

Python, TypeScript, JavaScript, C#, C/C++, Java

Backend

.NET, Node.js (Express, Nest, Meteor), Django

Cloud

AWS, Azure, Microservices, NGINX/HAProxy, Docker

Frontend

React + Redux, Next.js, HTML, CSS

Databases

PostgreSQL, CosmosDB, MongoDB, Neo4j, Redis

AI

NPU, LLMs, AI Agent Orchestration, RAG (Retrieval-Augmented Generation), Intel OpenVino, OpenAI Whisper, NPU

📁 Experience

Lenovo/Motorola, Research Engineer

07/2024 – Present | Yokohama, Japan

- Working on ThinkPad's flagship data telemetry project (ThinkLog) used C#, .NET, Python, SQL and CosmosDB to generate insights with Approx. 5 TB data
- Core member of Lenovo Intelligence Platform team (LIP) Japan team
- Working for Lenovo Vantage in local AI development (Chip-level) for future PC Self-healing and Security initiatives
- Active in NPU (Neural Processing Unit) research for a NLP Audio/Video project Meeting Maximizer using Intel OpenVino and Whisper
- Researcher for UDS (Lenovo's Private Cloud) and UDC (Universal Device platform)
- Lenovo AI Hackathon 2024 winner (APAC)

Japan Airlines (JAL), Sr. Software Engineer

11/2023 – 07/2024 | Takamatsu, Japan

- Implemented internal Employee portal features like Insurance, Applications and Payroll etc. using Node.js and Python
- Used AWS and GCP for cloud integrations and deployments on Test, Staging and Production servers
- Maintained legacy PHP Laravel based systems and improved test unit coverage

Argon Tech, Full Stack Engineer (Team Lead)

09/2022 – 11/2023 | Lahore, Pakistan

- Lead Backend Engineer of Masoon Banking app - Saudi Arabia based fintech application. Obtained Saudia's central bank and OpenID FAPI certifications

- Team lead of Galileo protocol - French Multichain Tokenization platform. Developed decentralized car tracking application for BMW and Porsche
- Full Stack development and DevOps with Node.js (Nest.js), Docker, React, AWS, Linux and PostgreSQL

Youpal Group, Full Stack Engineer

05/2021 – 09/2022 | Stockholm, Sweden

- Worked as a Full Stack Developer with Node.js, Django, React and ERP Next
- Developed DoktorsJouren (Placement app for health professionals) and YouMedico (Telemedicine app)
- Developed CI/CD pipelines for private Linux servers, integrated Minio and Next Cloud
- Created data infrastructure by connecting ERP Next and Node.js with MariaDB and MongoDB to manage 10,000 transactions per day

Upwork., Software Developer

04/2019 – 05/2021 | Remote

- Earned Top Rated Freelance Software Engineer badge
- Developed Web applications using React, Node & Mongo for International clients
- Designed and implemented SQL and NoSQL based databases
- Created DevOps workflows for E-Commerce websites

Education

Bachelor's in Computer Science, COMSATS University

- Specializations: Software & Database Engineering
- Received PEEF undergraduate Scholarship
- Group leader for Final Year Project - Online Election System for Pakistan

Full Stack Development, Hong Kong University

- Hands-on specialization with 3 certifications covering all aspects of Software Development Lifecycle

Certificates

Data Science Specialization - IBM • Web Development Specialization- University of Michigan •
AWS Technical Essentials - AWS • Cloud native development with Kubernetes - Red Hat •
Comparative Cloud Technologies - Charles University

Languages

English – (Professional) • **Urdu** – (Native)
